Re: Comments on Draft Public Notice and Public Meeting Presentation
Overheads for Medley Farm Superfund RI Public Meeting

Dear Mr. Dunning:

I received one copy of the draft Public Notice announcing the May 24, 1990 public meeting on the draft Remedial Investigation report and a draft copy of the overheads to be used in the presentation. Both of these items were submitted on May 16, 1990. Below are the comments on these deliverables. Please make the identified changes and submit the revised/final copies.

The only change to be made to the draft public notice is to add a sentence stating the existence of an Administrative Record at the local library where additional information can be obtained by interested citizens.

Below are comments on the overheads.

1. Page 5, Overhead on "Primary Field Work Conducted During The Remedial Investigation": This overhead identifies three activities (Soil Borings, Test Pits, and Monitoring Wells). Separate each of these activities and present only one activity on an overhead, therefore, instead of one overhead there will be three overheads presenting this information.
2. Page 7, Overhead on "Phase IA Field Investigation". This overhead presents the Objectives and Field Work Performed as part of Phase IA. Separate the Objectives and Field Work Performed on to two overheads.
3. Page 8, Overhead on "Phase IB Field Investigation". This overhead presents the Objectives and Field Work Performed as part of Phase IB. Separate the Objectives and Field Work Performed on to two overheads.

Printed on Recycled Paper

4. Pages 9 thru 11, Overheads on "Results Of Soil Boring Tests": Each of these overheads presents the contaminants found in the soil borings at a particular depth (Shallow Depths, Medium Depths, and Greatest Depths). Combine the results of these overheads onto one overhead. Do not discriminate by depths.
5. Page 14, Overhead on "For Further Information About The This Site, Contact:" Add "Mr." in front of Thom Berry's name.

I provided Ms. Kym Estis, Booz, Allen & Hamilton, on May 10, 1990 copies of additional figures I wanted overheads made of. The majority of these figures came from either the RI/FS work plan or the draft RI report.

If you have any questions with respect to the above comments, please call be at 347-7791.

Sincerely yours,

Jon K. Bornholm
Remedial Project Manager

COMMUNITY RELATIONS CONTACT REPORT

NAME: Barry Rosenberg	FROM: Stuart News	CONTROL NO.:
PHONE/ADDRESS: (305) 287-1550 ext. 207	PO Box 2870 Stuart, FL 33495	
NAME (NUS): Jeff Dunckel	SITE: Florida Steel	
EPA REGION: EPA Region IV	DATE: 11/30/83	PLACE: ————— 4:00 PM

NATURE OF CONTACT:

Received phone call from Mr. Rosenberg. He has been writing stories on the Florida Steel Site and wanted to know what NUS was doing on the site. He had been told by a citizen I had contacted that we were writing a RAMP. I explained that a RAMP was an assessment of what was known about the site and what was not known about the site. I explained that I was writing a community assessment for the RAMP and that my assessment was to summarize issues and concerns the community has regarding the site. He proceeded to discuss a variety of concerns the community had over the site. I referred all questions about the project to Al Hanky (RSPO) and Gordon Kenna (Community Relations - EPA). He asked about NUS' role in the Superfund cleanup. I stated that we were under contract to EPA, and that Don Lachman

	<p>could provide him with more information on our role and involvement in the contacts. He appeared to appreciate these additional contacts. He informed me that a public meeting would be taking place in the next couple of weeks and stated if I wanted to find out about the citizens' concerns — that would be the place to do it. I thanked him for the information and told him that I'd notify Gordon Kenna about this event. He concluded by requesting that we notify him of any activities or findings regarding the site. I advised him that we would be glad to share anything EPA authorized us to.</p>
